

Construction Update

Construction is underway on the new decks and is ahead of schedule. Project completion is anticipated to be within the next few weeks.

During the tear down process, the contractors have found that some deck boards are in poorer condition than others. Unfortunately until demolition is underway, it is difficult to determine visually what condition each deck may be in.

All decks will be brought to current code and safety standards so you can continue enjoying your deck for the years to come.

We ask at this time that you exercise caution and remove all items on and beneath your deck. As well, please refrain from using your deck until construction is complete. For safety purposes accesses to the decks will be blocked for the duration of construction once decks are cleared of personal items.

If any questions, please contact C-ERA Property Management at 403-266-0240.
