

Eversyde on the Park

IT IS TIME TO WINTERIZE

Winter is around the corner and it is important for all homeowners to take necessary precautions to prevent pipes from freezing. Frozen pipes can cause damage that is potentially very costly to the corporation, of which you are an owner.

Here are a few helpful reminders;

- Turn off the exterior faucet, disconnect outside hoses and drain the line.
- Do not leave your windows or patio doors open. This is the leading cause of water damage claims.
- Do not turn off the heat when you go on holidays or away for the weekend.
- Test run your heating system and replace your furnace filter.

In accordance with the Corporation's Bylaws Article 45 (d.) page 15 – unit owners who neglect these guidelines and cause frozen pipes will be held financially responsible for damages.

During heavy snow fall, please take note that half of the visitor's parking will be use to store the snow. Kindly make arrangement with your neighbors if you have a guest and there's no room for parking in your stall or the nearest visitor's parking.

Thank you for your cooperation.
